Message from The Principal

Learning about animals provides a comprehensive foundation for children, influencing not only their knowledge but also their emotional intelligence, sense of responsibility, and connection to the natural world. These early lessons create a foundation that contributes positively to their development and to society.

It also helps them in

- Developing Empathy and Compassion
- Improving Social and Emotional Skills
- Building Responsibility and Accountability
- Patience and Trust
- Adaptation and Resilience
- The Value of Cooperation

These lessons enrich kids' understanding of the world, cultivating their ability to connect compassionately with others and encouraging them to grow into responsible, thoughtful individuals.

S Maya
Principal

Message from The Pre-Primary Coordinator

Dear Parents,

This month, our young learners have been exploring new topics in the classroom! They've been learning about various animals, familiarizing themselves with letters and phonics, and practicing numbers with its quantity. Each activity is designed to encourage curiosity, and foundational language and numeracy skills.

We encourage our ever -supportive parents to use the digital resources provided to engage children purposefully at home. Children might enjoy sharing their favourite animals or practicing letters and numbers with you at home!

Thank you for your continued support in their learning journey.

-B Deepa
Pre -Primary Coordinator

Theme of the Month : Animals

What did our Chingums learn this month?

- Identifying animals and habitat
- Identifying letters and its sound
- Identifying numbers and match with its quantity
- Show kindness to all

Activity Time

Spindle Box Activity

The Spindle Box activity induced children to develop foundational math skills and improve their concentration. In this activity, children practiced placing the correct number of spindles into each numbered compartment, building their counting skills and reinforcing one-to-one correspondence.

Activity Time

Sorting and Matching

Using cotton balls, the children practiced their counting skills by placing the correct number of cotton balls next to each number. This hands-on activity helps reinforce number recognition, counting, and fine motor skills.

Activity Time

Position - Sticker Activity

students took part in a sticker activity to learn about the position of objects. Using colourful stickers, children practiced concepts like 'on', 'in front of', 'up' and 'down.'" This activity helps students develop spatial awareness and understand positional words, which are essential for early numerical and language skills.

Activity Time

Paper Folding - Bird

Students explored creativity and fine motor skills through a fun paper-folding bird activity. As they learned to fold paper into the shape of a bird, the children practiced following steps, building hand-eye coordination, and boosting their concentration.

Activity Time

Sorting

Using the models, children sorted animals based on their habitats, identifying which animals live in water and which live on land. This activity helped children build classification skills, expand their vocabulary, and deepen their understanding of the natural world.

Activity Time

Identifying Letters and Associated pictures

Children walked on their tiptoes to identify the letters and pictures laid on the floor. This activity enhanced their letter and picture recognition, vocabulary, balance, and coordination skills, making learning active and enjoyable.

Activity Time

Creep and Seek

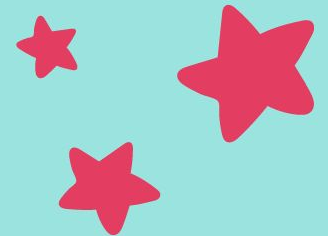

This activity combined identification of birds, physical movement, observation skills, and learning, keeping the students active and engaged in the lesson.

Activity Time

Find your Number

This activity combines physical movement, counting, and fine motor skills, making learning numbers an interactive and fun experience!

Activity Time

Cards and counters

This activity helped students reinforce their ability to recognize numbers and practice counting with one-to-one correspondence, develop fine motor skills and concentration.

Activity Time

Identification of pictures and beginning sound

The activity includes identification of pictures and beginning sounds to help young learners build foundational literacy skills, phonetic awareness, and vocabulary.

Celebration Time

Name of the celebration: Creative Fair

Date: 25-10-2024

Creative fair was a fantastic experience for the kids, showcasing their learning in such an interactive way, with peers and teachers from other grades participating, not only boosts their confidence but also deepens their understanding as they explain what they've learned.
