Message from The Principal

Dear Little Learners,
Greetings to all of you! Let's talk about something very important for our growing bodies and bright minds – *food*! Food gives us the energy to play, learn, and grow strong. Eating the right kind of food, like fruits, vegetables, and healthy snacks, helps us stay active and happy. On the other hand, eating too much junk food can make us feel tired and unwell.

Let's showcase the **Culinary Fun** by preparing refreshing lemonade – a healthy drink you can enjoy! Speak about the difference between healthy and unhealthy foods. Sharing what you know will be so much fun! **Reading Adventures** to explore stories that teach us why eating healthy food is so important.

Tuning with Academics ,Practice tracing letters and numbers in sand to improve your writing and motor skills, Learn about the concept of *more and less* through fun games and activities by exploring math concepts.

These activities will make learning joyful while helping you develop good habits, like eating healthy food. Remember, eating right keeps you strong, smart, and full of energy to do all the things you love.

Keep smiling, keep learning, and keep growing!

S Maya
Principal

Message from The Pre-Primary Coordinator

Dear Parents,

We are thrilled to share with you the wonderful progress our Pre-Primary children who have made as part of our recent theme on "**Food.**" This theme has been full of exciting hands-on learning opportunities where the children not only explored different food items but also engaged in various activities that supported their academic development in math and language.

Through interactive and engaging activities like, role play, making simple food crafts, arranging food items based on size or color, sorting, our young learners have not only gained valuable knowledge about food and numbers but have also developed essential skills in problem-solving, critical thinking, and collaboration.

We are so proud of their progress and look forward to more exciting learning experiences ahead.

Thank you for your continued support in making this journey a success!

-B Deepa
Pre -Primary Coordinator

Theme of the Month : Food

VEDANTA
ACADEMY

What did our Chingums learn this month?

Learning Outcome

- Read and Write CVC Words ('od', 'ob', 'ot' and 'ub' words)
- Read and use sight words to read sentences
- Developing Vocabulary
- Identify and sort healthy and unhealthy food items
- Identify sources of food (Plants and Animals)
- Taste of food items
- Read and compare the numbers
- Group objects in tens and ones

Activity Time

VEDANTA
ACADEMY

Story – Manav cook's for Mummy
Role play

This activity fostered creativity and imagination as children took different roles and brought the story to life. It supported language development by encouraging dialogue and communication skills.

Activity Time

Group Discussion

Exploring and experimenting with different tastes is an exciting and dynamic process that enhances the culinary art of children. The discussion also covered the importance of taste exploration, provided examples of how different tastes can be combined, and highlighted the benefits of experimenting with food.

Activity Time

Addition

The activity allowed children to see how numbers relate to one another when combined. This hands-on approach made the abstract concept of addition more tangible and easier to grasp.

Activity Time

Associating numbers with words

By associating numbers with their words, children visually and cognitively link the number symbol (1, 2, 3) with its corresponding word (one, two, three). This dual recognition enhanced their ability to identify numbers quickly and accurately, laying a strong foundation for future math skills.

Activity Time

Sorting Healthy and Unhealthy Food

VEDANTA
ACADEMY

Activity Time

Bingo Game

The game helps young learners to identify CVC (Consonant-Vowel-Consonant) words and match them with corresponding pictures. This activity not only supported literacy development but also encouraged teamwork and collaboration, as the students worked together to win the game. The activity made learning both fun and engaging.

BINGO!

Activity Time

Pineapple craft

VEDANTA
ACADEMY

This hands-on craft activity was a wonderful way to nurture essential skills like eye-hand coordination, cognitive, socio-emotional and to have a deep understanding of the concept

Activity Time

Addition with ice-cream sticks

VEDANTA
ACADEMY

The activity allowed children to see how numbers relate to one another when combined. This hands-on approach made the abstract concept of addition more tangible and easier to grasp.

Activity Time

The Little Plant drawing

The activity allowed children to see how numbers relate to one another when combined. This hands-on approach made the abstract concept of addition more tangible and easier to grasp.

Activity Time

Jump on the zigzag line and read the sight words

The children engaged in an active learning activity where they identified sight words by jumping with their feet together. This exercise not only reinforced word recognition but also incorporated physical movement, enhancing eye-foot coordination.

Activity Time

Jump into the circle and read the number names

The children enjoyed the activity where they jumped into a circle and identified numbers written in words. This fun, interactive exercise not only made learning engaging but also helped enhance their memory skills, as they associated physical movement with number word recognition.

What's coming up next month?

Christmas Celebration -
21-12-2024, Saturday

Thank you!
